- Siyabonga Coka
- Talha Minhas

## 2 Discussion/Engagements

- We discussed the Travis-CI issue with builds failing on all branches.
- Taiga removed everyone from the project - emails have been resent to everyone on the team to rejoin.
- The fake server needs to be reworked to provide *http* responses similar to how the real API will work, so that when the actual server is up and running we can just slot in the new URL and everything should work.

### **3 Conclusion**

The meeting was very brief, there was not much to dwell on about.
